

The NIH Public Access Policy

The NIH Public Access Policy ensures that the public has access to the published results of NIH funded research. It requires scientists to submit final peer-reviewed journal manuscripts that arise from NIH funds to the digital archive PubMed Central upon acceptance for publication. To help advance science and improve human health, the Policy requires that these papers are accessible to the public on PubMed Central no later than 12 months after publication.

The NIH Public Access Policy applies to any paper that...

- Is peer-reviewed;
- And, is accepted for publication in a journal on or after April 7, 2008;
- And, arises from:
 - Any direct funding from an NIH grant or cooperative agreement active in Fiscal Year 2008 or beyond, or;
 - Any direct funding from an NIH contract signed on or after April 7, 2008, or;
 - Any direct funding from the NIH Intramural Program, or;
 - An NIH employee.

How to Comply

1. Address Copyright

Before you sign a publication agreement or similar copyright transfer agreement, make sure that the agreement allows the paper to be submitted to NIH in accordance with the Public Access Policy

2. Submit Papers

Authors may submit a paper to the journal of their choice for publication. There are four methods to ensure that a manuscript is submitted to PubMed Central in compliance with the NIH Public Access Policy:

Method A: Publish in a journal that deposits all NIH-funded final published articles in PubMed Central (PMC) without author involvement.

Method B: Make arrangements to have a publisher deposit a specific final published article in PubMed Central (PMC).

Method C: Deposit the final peer-reviewed manuscript in PMC yourself via the NIH Manuscript Submission System (NIHMS).

Method D: Complete the submission process for a final peer-reviewed manuscript that the publisher has deposited in the NIH Manuscript Submission System (NIHMS).

3. Cite Papers

When citing their NIH-funded papers in NIH applications, proposals or progress reports, authors must include the PubMed Central reference number (PMCID) for each paper.
